TO
NURSING

HELLO

A life in nursing is more than just a career. It is a commitment to uphold the values of the profession by caring for the needy, providing appropriate medical care and respecting the rights of patients and their families, all while remaining calm under extreme pressures.

In order to succeed in this demanding profession, a solid grounding in theoretical and practical knowledge is essential. Here, at the International Institute of Science Mantin, or IASM, we pride ourselves in equipping tomorrow's nursing graduates with the necessary skills and the correct aptitude to make a career in nursing a rewarding one.

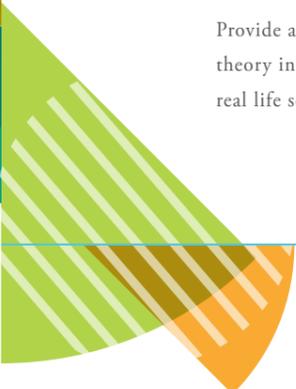

As a dedicated nursing institution, we offer students an in-depth grounding in the principles of the medical profession while providing ample opportunities to put theory into practice through mock scenarios and real work placements. All throughout, a focus on evidence-based nursing practices means that students understand the complex medical theory behind their actions.

Based in Mantin, Negeri Sembilan, our campus provides the perfect base for students to advance knowledge and skills in a safe, secure and nurturing environment, with lecturers close at hand and a conducive study environment right outside their doorstep.

For nursing students seeking to take the leap into this challenging world, IASM is the start of a lifelong journey of self-discovery and exploration.

Josephine Tan Ei Kheng
Malaysian, Diploma in Nursing
International Institute of Science Mantin

OUR PURPOSE

IASM endeavours to contribute to the nation's growth and development by being a forerunner in providing students a nursing education that prepares them to succeed both within and outside the country.

In forging world-ready graduates who can succeed in any setting, IASM strives to:

Adopt a multidimensional, participatory approach to learning that develops students' intuitive and practical skills, thus deepening understanding of the subject matter.

Provide ample opportunities for students to place theory into practice through clinical placements and real life scenarios.

Cultivate a curious and outgoing mindset in students through exposure to different cultures and ways of thinking within an inclusive campus setting.

Create an inclusive and conducive place for study through a positive, nurturing campus setting.

Rozaine Binti Osman
Malaysia, SON
International Institute of Science Mantin

Teaching methods used at IASM centre around providing the student know-how which can be applied in the real world of nursing.

Beyond textbooks, lecturers seek to give students the opportunity to understand the subject matter practically through mock scenarios and case studies, and strong relationships with local hospitals provide students useful experience through clinical placements.

Within the university, we seek to develop nurses who live up to the highest standards of the profession by:

- ▶ Displaying deep knowledge of concepts in nursing practice.
- ▶ Demonstrating strong competencies in communication.
- ▶ Demonstrating professional efficiencies as a practitioner.
- ▶ Understanding and delivering care that is ethical and catered to the individual's needs.
- ▶ Assimilating contemporary, professional and scientific values in nursing practices.

In forging such well-rounded and adaptable nursing graduates, emphasis is placed on creating a classroom setting where students feel comfortable to challenge assumptions and put forth their own theories and ideas. Such a participatory approach brings the subject matter to life and deepens the student's understanding of the topic at hand, thus giving students greater value for their education.

As always, we aim to produce graduates who not possess academic knowledge but also the social and emotional skills to adapt to the global job environment, and a diverse and international campus setting plays an important role in preparing students for the wider world upon their graduation.

We provide wide range of academic support services, ensuring a university experience that is both academically fulfilling and socially enriching.

Counselling & Career Guidance

No matter the issue – whether concerning emotional health, stress, studies, time management, relationships or any other problem – our experienced guidance counsellors are here to help.

Mentor/Mentee Programmes

During their time on campus, all students are paired with a mentor who is responsible for guiding their personal and academic development. As an experienced member of the academic staff, mentors provide students solid counsel on how to overcome the challenges of university and can arrange for extra tutorial and academic counselling sessions, if required.

Live Projects

Live projects offer our students the opportunity to work with industry-leading companies, directly applying academic theories to a real business situations and developing invaluable practical and intuitive knowledge of the chosen subject. These live projects have great value to employers and are a boost to graduates' employability, no matter where they choose to venture.

Graduate Placements

The Graduate Placement unit assists participating corporations to identify suitable jobs and training opportunities for our undergraduates and graduates. It also organises workshops for graduating students to learn the finer points of preparing resumes, attending job interviews and selecting jobs and careers.

Diploma in Nursing

Programme Code	JPT/BPP (A9566) 06/19
Duration	3 Years
Career Prospects	Registered Nurse, Nurse Specialist, Occupational Health Nurse, Nurse Administrator, Nurse Educator, Nurse Researcher, Principal of Nursing School.
Awarding Body	Institut Antarabangsa Sains Mantin
Intakes	Main intakes: April, August and December

Programme Overview

The programme is designed to develop students' know-how in nursing, enabling them to provide safe and competent care in various healthcare settings. The course combines theoretical learning in classrooms and practical training in simulation wards and skills lab. In addition, students will be required to attend practical placements in participating local hospitals. The strong emphasis on nursing knowledge and hands on training ensures graduates' competency as Registered Nurses as well as giving them the advantage in the graduate marketplace.

The curriculum for the Diploma in Nursing programme is based on the national requirements of the Malaysia Nursing Board and is fully approved. A feature of the programme is that it gives the student a wide variety of experience in the different fields of nursing. By the end of the programme, the student will be able to decide what particular area he or she wishes to join.

To assist in career prospects, IASM arranges placements for successful candidates to guarantee a place in the healthcare services, either in the government or the private sector.
